

Neuro-Ophthalmology (Textbook of Ophthalmology) (v. 6)

This text presents both the basic science and the clinical manifestations in the field of neuro-ophthalmology. Original, full-colour illustrations are used throughout every chapter, some of which address supranuclear disorders, the optic neuropathies, disorders of ocular motility and distinguishing optic nerve disease from retinal/macular disease. There are eleven contributors included in the text which is written to be accessible to undergraduate level medical students. The work is primarily intended for use by ophthalmologists.
