

Angels & Monsters: A Child's Eye View of Cancer

In this awe-inspiring photographic essay, 25 childhood cancer patients are portrayed as they express through art and words their feelings about the cancers that threatened them. Revisiting the survivors, some of whom are now young adults embarking on careers and starting families, this compassionate tribute to children's resiliency and determination honors the lives of the children it portrays and the lives of other children like them worldwide, offering comfort and hope to others.
