

Konstantin Grcic: Abbildungen / Figures (English and German Edition)

In devising a concept for the Abbildungen exhibition, Konstantin Grcic thought back to one of his earliest designs, an additional pedestal for a sculpture by Constantin Brancusi. This became the leitmotif of his staging of twenty-one selected objects. The exhibition is the underpinning for the conception of this publication, which turns its gaze on the media-framing of Grcics design objects. First researched in early magazines, company prospectuses, flyers and other print media, the selected pieces are presented here as reproductions of reproductions. The publication is accompanied by an in-depth analysis by Robin Schuldenfrei, Professor at the Courtauld Institute of Art in London, who, in presenting Konstantin Grcics oeuvre to the German-speaking world, examines it from a historical perspective for the first time. Finally, the staged gallery spaces at Kunsthalle Bielefeld are documented in photographs by Wolfgang Gunzel, Offenbach.
