

Pathology of the Uterine Cervix, Vagina and Vulva

The 2nd Edition of this popular volume in the Major Problems in Pathology series represents a comprehensive monograph on the pathology of the lower female genital tract, with a particular emphasis on uterine cervical cytology and the various other ancillary methods utilized to diagnose its diseases. It explores the full range of clinical and pathologic findings encountered in practice, defines their diagnostic features and criteria, and presents effective strategies for solving diagnostic challenges. It incorporates comprehensive updates throughout to reflect the very latest developments in the field, including the new Bethesda System for classifying cervical cancer.
